

LIMITED-EDITION EXCLUSIVES THIS MONTH ONLY

BacLock®

Our cuddly chenille microfiber will inspire your kids to wash and dry their hands every time!

Washing your hands for at least 20 seconds with soap and water is one of the most effective ways to prevent the spread of germs. Drying hands thoroughly is important too, as germs can be transferred more easily to and from wet hands.

1 Kids Pet To Dry, baby shark

Item#: CU1OCT

\$31.99

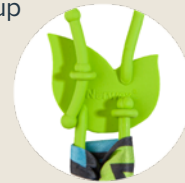

Glasses, phones and many other devices are touched by our hands and face daily, risking the spread of germs. Cell phones alone can carry up to 10 times more bacteria than a toilet seat and are touched an average of 47 times a day.

1 Optic Scarf, petite, geometric

Item#: CU2OCT

\$17.99

Clean screens, glasses and more with this bright, new pattern and adjustable silicone hanger.

OCTOBER CUSTOMER SPECIAL
